

MOBILISIS[®]

Mobility driven by technology

INTEGRATED SOLUTIONS FOR SMART BUSINESS

Solutions catalog

MAGSENSE

Intelligent traffic solutions for parking control and traffic management.

- Smart parking sensors and solutions
- Traffic counting solution
- Parking solution for electric charging stations
- LED screens for information
- Detection of vehicle parameters

SICK

Sensor Intelligence.

Distributing leading global manufacturer of industrial sensors and solutions in industry 4.0

- Factory Automation
- Logistics Automation
- Process Automation

FLEET

Intelligent system for vehicle tracking, management, optimization, monitoring and fleet administration.

- Cars and vans
- Truck, coaches and busses
- Construction equipment
- Customized solutions
- Optimization of logistics processes

ENTRYMO

Management systems & solutions for access and identity applications in closed business premises and company environment.

- Working hours management
- Access control and vehicle identification
- Object access control
- Entrymo - platform
- Entrymo - mobile application

SCHEIDT&BACHMANN

Distributing leading global manufacturer of equipment for outdoor parking lots and parking garages.

- Barriers
- Entrance and exit terminals
- Payment terminals
- LPR - camera systems
- Access control and vehicle identity

SPOTIUM

Smart autonomous solutions for personal monitoring, smart homes and offices, micro mobility and object tracking.

- AgriStick - agrometrological smart device
- SpotiShop - product labeling
- SpotiTrack - location tracking device
- SpotiBox - emergency calling device
- SpotiOffice - smart office device
- Spotium - mobile application

ABOUT MOBILISIS

Mobilisis develops specialized electronic equipment aimed at innovative Industry 4.0 and IoT markets. Close integration characterizes hardware and software components made by Mobilisis, making them perfectly suitable for even the most complex business processes, and the most demanding real-time data processing.

Mobilisis Cloud infrastructure is a foundation for various IoT projects, enabling data transfer, storage, presentation, and processing. The largest application of the platform by far is Fleet Management and Intelligent traffic solutions. The key advantage of Mobilisis is its in-house development team dedicated to providing solutions for any customer requirement. Our team of top engineers designs and develops top-quality hardware and software used in Mobilisis products. Our installation and customer support teams are willing to go the extra mile to show that the satisfaction of our customers and employees is crucial.
